

ECHT 2025 - Index

How can low pressure carburizing save your money and increase process efficiency ?

Bazel Michal, SECO/WARWICK S.A, Poland..... 4

Flexible and modular multiprocess installations

Beaujon Kevin, ECM Technologies, France..... 15

Importance of radiative heat transfer in industrial furnaces: insights from numerical simulation of single and multi-part heating

Binagot Max, Transvalor S.A, France 17

Heat treatment strategies for tailoring the microstructure of aluminium matrix composites fabricated via LPBF

Bona Marco, Politecnico di Milano, Italy 25

Modern quenching oils for use in low-pressure carburising processes: Requirements - properties – applications

Braun Rainer, BURGDORF GmbH & Co. KG, Germany 31

Effect of laser shock peening and hot isostatic pressing on the microstructure of MoNiCr nickel based alloy

Bricín David, Research Centre Řež, Czech Republic 41

CFD simulation of air quenching

Cardon Amandine, Safran Tech, France 49

Hydrogen susceptibility linked to the mechanical properties and microstructural aspects of common steel for future decarbonated mobility

Catteau Simon, ABS Centre Métallurgique, France 56

Optimal design of steel grades to meet a target hardenability profile through evolutionary computation and autoencoders

Colla Valentina, Scuola Superiore Sant'Anna, TeCIP Institute, Italy 64

Influence of HIP on the mechanical properties of selected metallic materials

Čegan Tomáš, VSB - Technical University of Ostrava, Czech Republic 72

Phosphorus embrittlement in austenite during heat treatment of an air hardening steel

David Daniel, University of Applied Sciences Upper Austria, Austria 80

Utilization of ann supporting heat treatment processes

Felde Imre, Obuda University / IFHTSE, Hungary 88

Cooling curve analysis of an aqueous polyvinylpyrrolidone (PVP) polymer quenchant as a function of fluid velocity	
<i>Gallegos Cantu Sergio, Quaker Houghton, United States</i>	<i>96</i>
Limitations of standard probes for the measurement of spray quenching	
<i>Goldstein Robert, Fluxtrol, Inc., United States</i>	<i>104</i>
Mechanical properties of 6000 series aluminum substrates joined together using a flux-free brazing technology in a graphite vacuum furnace	
<i>Hadian Amir, University of Applied Science Northwestern Switzerland, Switzerland</i>	<i>113</i>
Prediction of power and energy demand for hybrid furnaces to optimize the use of fluctuating green energy sources	
<i>Hellwig Martin, Ipsen International GmbH, Germany</i>	<i>128</i>
Homogenization of the element distribution during wire electron beam cladding of CuAl8 onto AlSi10Mg	
<i>Hengst Philipp, Technische Universität Bergakademie Freiberg, Germany</i>	<i>136</i>
Analysis of effects due to stepped quenching during case hardening of gears	
<i>Hunkel Martin, Leibniz-Institut für Werkstofforientierte Technologien – IWT, Germany</i>	<i>144</i>
Effectiveness of surface activation in correlation with surface finishing condition for expanded austenite formation during plasma nitrocarburizing of AISI 316L	
<i>Jafarpour Saeed M., Technische Universität Bergakademie Freiberg, Germany</i>	<i>152</i>
Reduction of distortion by using of fixture hardening machines	
<i>Juretzko Harald, HEES GmbH & Co KG, Germany</i>	<i>161</i>
Vacuum oil quenching system : an enabler for treatment of massive pieces	
<i>Kaloč Václav, VSB - Technical University of Ostrava, Czech Republic</i>	<i>163</i>
Microstructure and mechanical properties of low-carbon steels quenched and tempered after gas carburizing, carbonitriding, and nitriding	
<i>Kawata Kazuki, Kawata PE Office, Japan</i>	<i>172</i>
Cleaning for heat treating	
<i>Kozdroń Sebastian, Quaker Houghton, Poland</i>	<i>180</i>
Hydrogen in high-pressure gas quenching: creating opportunities	
<i>Kraus Dominic, Aichelin Holding GmbH, Austria</i>	<i>188</i>

Heat treatment path towards sustainable and CO₂-neutral manufacturing through digital tools and renewable fuels	
<i>Kus Paulina, Air Products PLC, United Kingdom</i>	<i>189</i>
Metallurgical characterization of electrodeposited hard chromium from a trivalent inorganic electrolyte	
<i>Le Barbenchon Romain, La Rochelle Université, France</i>	<i>198</i>
Water spray quenching – a new process option for intensive quenching of serial parts	
<i>Löser Klaus, ALD Vacuum Technologies GmbH, Germany</i>	<i>208</i>
Effect of heat treatment on mechanical properties, microstructure and corrosion resistance of M789 steel produced by LPBF method	
<i>Málková Andrea, University of West Bohemia in Pilsen, Czech Republic</i>	<i>211</i>
MoNiCr nickel alloy for energy industry applications produced via additive manufacturing	
<i>Nacházelová Daniela, COMTES FHT a.s., Czech Republic</i>	<i>212</i>
Lasers in additive manufacturing	
<i>Němeček Stanislav, University of West Bohemia in Pilsen, Czech Republic</i>	<i>217</i>
Intermetallic composites as wear resistant materials	
<i>Novák Pavel, University of Chemistry and Technology, Czech Republic</i>	<i>218</i>
Energy and CO₂ emission evaluation of a vacuum gas quenching process	
<i>Özdeşlik Beste, Aichelin ST GmbH, Türkiye</i>	<i>224</i>
Mössbauer spectroscopy and its application to the characterization of heat treated parts	
<i>Pechoušek Jiří, Palacký University Olomouc, Czech Republic</i>	<i>234</i>
Grades for transmission parts with improved resistance to fatigue and in-use softening	
<i>Picot Thomas, Arcelormittal Maizieres Research SA, France</i>	<i>240</i>
CQI-9 Guideline is an opportunity or a burden?	
<i>Rašková Stanislava, Czech Society for Quality, z.s. , Czech Republic</i>	<i>249</i>
Numerical modelling of the carburization - quenching process in steels	
<i>Salim Ben Ayed, GeePs-CentraleSupélec and LSPM-USPN, France</i>	<i>257</i>
Optimizing gas flow in a furnace through numerical simulation: A case study using qobeo®	
<i>Sardo Lucas, Sciences Computers Consultants, France</i>	<i>265</i>
Laser hardening of complex geometries with dynamic beam shaping and tempera-ture field control	
<i>Seifert Marko, Fraunhofer IWS Dresden, Germany</i>	<i>270</i>

From automation to intelligent autonomy: AI and Edge Control in sustainable heat Treatment	
<i>Sherwin Peter, Eurotherm by Watlow, United States</i>	<i>271</i>
Center of excellence for medical applications	
<i>Stanislav Jiří, JST Consultancy, Czech Republic</i>	<i>277</i>
High-temperature heat pumps for waste heat upgrading in industrial heat Treatment	
<i>Špale Jan, Czech Technical University in Prague, Czech Republic</i>	<i>281</i>
Non-destructive evaluation of layers after thermo-chemical Treatment	
<i>Tesárková Klára, Bodycote HT s.r.o., Czech Republic</i>	<i>287</i>
Innovations in high power laser cladding: the COAXquattro and Flextrack systems for enhanced manufacturing efficiency	
<i>Toma Laura, Fraunhofer IWS Dresden, Germany</i>	<i>292</i>
Innovations in vacuum aluminum brazing furnaces for contemporary EV thermal management systems	
<i>Valsecchi Giorgio, TAV VACUUM FURNACES, Italy</i>	<i>294</i>
Vacuum oil quenching system : an enabler for treatment of massive pieces	
<i>Villard Cédric, ECM Technologies, France</i>	<i>300</i>

Posters

Analysis of heat treatment effects on the microstructure and mechanical properties of 3D-printed and conventionally manufactured H11 steel	
<i>Fialová Pavlína, University of West Bohemia in Pilsen, Czech Republic</i>	<i>304</i>
Local temperatures in mechanical alloying	
<i>Jeníček Jan, University of Chemistry and Technology, Czech Republic</i>	<i>305</i>
Innovative heat-treatment for manufacturing structural parts from high strength aluminum alloys	
<i>Kumar Manoj, EBNER Industrieofenbau GmbH, Austria</i>	<i>313</i>
Changes in mechanical properties of medium manganese steel after forming and heat Treatment	
<i>Leták Radek, University of West Bohemia in Pilsen, Czech Republic</i>	<i>314</i>
High surface hardening depths in large rolls and how specially adapted converter technology helps to achieve them	
<i>Tränkner Christine, ITG Induktionsanlagen GmbH, Germany</i>	<i>315</i>

Press-hardening of high carbon low-density steels

Votava Filip, University of West Bohemia in Pilsen, Czech Republic 319

Annealing treatment and microstructure analysis on the electroplating Ni-B alloys prepared in TMAB enriched watts baths

Yu Ing-Song, National Dong Hwa University, Taiwan 320
